"At Your Service" For the 38th Year

•
THE PAGE SEED COMPANY

GREENE, NEW YORK

Greene, N. Y., February, 1934

To our Customers and Friends:—

We present our 38th Annual Price List for your consideration. Here you will find prices for Dealers only, that is for those who buy for resale to the consumer or user. These prices are those prevailing at the time of going to press, and those which we hope to be able to maintain throughout the season. However, these prices are subject to change without notice, as all orders will be accepted at the prices prevailing on the date the order is received, and subject to stock being unsold.

In going through the price list, you will note the absence of some prices, due to short crops and the like. The year 1933 gave us a poor growing season for many things. On some items we have been compelled to fill short, other kinds we were able to secure from responsible growers additional supplies, so that we could fill the orders booked in full, but have none to offer to the trade this spring. This condition is regrettable, but it cannot be helped. It is hoped that 1934 will provide enough of all kinds, so that there will be no short items another year.

The N.R.A. program has been in effect for several months now, and is showing some beneficial effects. With higher wages, and increased employment, the buying power of the Nation has been greatly increased, extending into all branches of trade, including the seed industry. Along with this increase in wages, there has been a corresponding increase in prices, as you well know.

The expense of production and distribution has taken a startling jump in the past few months. It will be felt next year more than now. We feel that if our customers will co-operate in helping us increase our volume of sales, it will not be necessary for us to advance prices in this list during the selling season. The united spirit which seems to be behind the President's program should instill confidence in all business men, especially those selling seed. We stand ready to lend our co-operation in putting through the program for a quick recovery, and solicit your co-operation in order to maintain our organization at its present high standard, and continue to supply the gardening public with the quality of vegetable, flower and field seeds that they have been receiving from us for more than three decades.

With this information, we hope and expect that you will look into your requirements for your spring supplies, and place your order as early as possible. If you use large amounts, we will be pleased to quote you on those requirements.

Terms: Vegetable Seeds—Net Cash, June 1st, 1934. A discount is allowed if paid within 10 days of date of invoice. Onion Sets, Grasses, etc., are Net Cash upon arrival. Corn, Oats, Millet, etc., are also Cash upon receipt of the goods. All F.O.B. Greene, N. Y. Containers are at cost. Note that these terms apply to our regular customers, or those with established credit rating. All others are cash with the order, or C.O.D.

In common with all reputable seed firms, and as members of The American Seed Trade Association, we offer and send out our seeds under the following Non-Warranty. "The Page Seed Co. gives no warranty express or implied, as to purity, description, quality, productiveness, or any other matter of any seeds, bulbs, or plants they send out, and will not be in any way responsible for the crop."

THE PAGE SEED COMPANY.

LAXTON'S PROGRESS

Due to a general shortage of the Gradus variety of Peas this season, we advised our trade that Laxton's Progress is a variety that would quite well serve as a near substitute for it.

The Laxton's Progress produce peas suitable for the table in about 60 days from the time of planting. While the Extra Early Gradus are about 2 days earlier.

The Gradus grow about 3 feet tall; pods are medium green, 4 inches long, $\frac{7}{8}$ inches wide tapered at the end; seeds are large, wrinkled, cream color.

Laxton's Progress grow about 20 inches tall; pods are deep green, 4 inches long about $\frac{7}{8}$ inches wide tapered at the end; seeds are large, wrinkled, cream color.

Laxton's Progress is considered a dwarf variety of Gradus. They are extra fine eating quality and merit the use of all who desire an early, sweet, productive variety for home, market, garden or shipping.

Price per pound, 15c; per 100 lbs., 13c.

PAGE'S GOLDEN BANTAM EXTRA SELECT

This is an extra early strain of 8 rowed Golden Bantam which we have been developing at Greene for a number of years. We consider it the earliest, large-eared type of the Golden Bantam variety.

You will be well pleased with this Extra Select strain.

BEANS

For those who desire a large semi-round fleshy podded, stringless, brittle variety, we believe our Select strain of Improved Golden Wax will meet the need. It is said that some types of Golden Wax are "run out." Not so with Page's Improved strain — we sell more of them each year. We believe they are the largest seeded, largest podded variety of Golden Wax on the market. You, too, will like them.

Page's High-Bred Seed Corn

(PA-SE-CO BRAND)

Our Seed Corn is put up in bags containing 2 bu. of 112 lbs. net, 56 lbs. to the bu. Bags are free in 2 bu. lots. All shipments are made on a freight allowed basis. Terms are:—**Sight Draft** with Bill of Lading, payable upon arrival of goods or check in advance. Write for our firm prices. The following varieties only have a brief description. All are described in our Corn Manual, which is free for distribution to your trade. Order a supply with your requirements.

Bloody Butcher—Early, ensilage variety; fine for high altitudes.

Champion White Pearl—Medium early, with a heavy growth.

Cornell No. 11—Heavy yielding, early, 8 ft. high.

Cuban Giant—Large variety, one of the best for the silo.

Early August—7 to 9 ft. high, matures early, fine in short seasons.

Early Eureka—Produces heavy growth, 10 to 12 ft. high.

Early Marvel—Excellent for silage. One of our leading varieties.

Early Mastodon—Ready for silo in 90 to 95 days, good yielder.

Early Triumph—Cross between dent and flint, stands drought.

Eighty Day—Medium size, one of the earliest dents.

Fullsilo—Gives large tonage and good amount of ears.

Gold Mine—Medium early, ready for silo in 90 to 100 days.

Golden Beauty—9 to 12 ft. high, resists wind and drought.

Golden Ensilage—Similar to Golden Beauty.

Golden Glow—Early, highly recommended for ensilage.

Golden Sweepstakes—Like Pride of York.

Hundred Day Bristol—Very prolific, does well on all types of soil.

Lake Erie Dent—Excellent ensilage corn.

Lancaster Sure Crop—High yielding, used for husking or ensilage.

Leaming—Improved. Superior to the old type.

Luce's Favorite—Northern grown, 10 to 12 ft. high, a hybrid.

Minnesota No. 13—Considered a 90-day corn, used for husking or silo.

Ninety Day—A favorite with our trade for over 30 years.

Northwestern Red Dent—Matures in 80 to 95 days, excellent for fodder.

Perfect Ensilage—Adapted to localities where the season is short.

Pride of Nishna—Tall growing, matures in 90 to 100 days.

Pride of North—Dark heavy foliage, earlier than Leaming.

Pride of York—Develops a heavy growth, fine for ensilage.

PAGE'S HIGH-BRED SEED CORN—Continued

Red Cob Ensilage—A desirable corn for green fodder.

Smoky Dent—One of the earliest types; excellent for ensilage.

Southern White—Late, fine for ensilage or green fodder.

Superior White Pearl—Early, adapted to short season localities.

Thepage Early Dent—An ideal ensilage corn.

True Eureka—Virginia grown, tropical growth, late.

West Branch—Abundance of foliage, large ears.

West Branch Sweepstakes—Early and productive. A leader for the silo.

White Cap Yellow Dent—An early ensilage variety. Sometimes used for husking.

Amber Flint—Large growing, used for husking.

Early Canada Flint—Good producer, one of the earliest corns.

Genesee Valley Flint—Large ears, sure to mature.

Golden Nugget Flint—Has heavy and abundant growth.

King Philip Flint—Early, one of the husking types.

Longfellow Flint—A large growing flint variety.

Mammoth Yellow Flint—Very productive, excellent for the silo.

New York State 8 Row—Most in demand as a husking corn.

Sanford White Flint—An old timer, early and productive.

Schoharie County Flint—Early, large growing variety.

PLANTS AND ROOTS

We will be glad to quote prices on Cabbage, Cauliflower, Celery, Egg Plant, Pepper, Tomato and other plants or roots.

BOOKS AND OTHER SUPPLIES

We can secure for you books on garden subjects or topics as well as all supplies needed by the gardening or farming trade. Write us your requirements.

Pages Standard Quality Seeds In Packets

If you do not already have a display of Page's Seed Packets, we can offer you an interesting opportunity to sell seeds on the commission or consignment basis. We have complete lines of varieties of vegetable and flower seeds in both the five and ten cent classes. These are sold only through dealers (not by school children) and are first class quality. The cabinets of seeds are placed with you on the consignment basis, the shipment going to you without cost, so that you have no investment. The unsold packets are collected by our representatives and returned to us with the cabinet, you paying for the seeds that you actually sold, less a liberal discount.

The packets are very attractive, especially our new ten cent line. The cabinets take up very little room, and you can have a choice of sizes. Additional packets for filling in the sold lines are shipped to you promptly, upon receipt of your request, at no extra cost to you. All varieties are chosen for their adaptability to your section of the country. There is no cutting of price, as each cabinet is plainly marked.

Our assortment of flower seeds is unusually attractive. Several new varieties having been added this season. We also have Beans, Peas and Corn in cartons which may be had if you desire them.

Write today, telling us your needs, and your preference as to size of cabinet, quantity of packets, and whether the five cent or the ten cent line or both. Your assortment will be shipped at once.
